Professional Summary

Experienced Technical Program Manager with over 9 years of expertise in leading cross-functional teams, driving full software development lifecycles, and delivering business-critical projects on time and within scope. Proven ability to manage and deliver cloud-based solutions, foster collaboration, and drive innovation in dynamic, fast-paced environments. Extensive experience in cloud platforms (AWS, Azure, GCP), Agile methodologies, and enterprise-level product management, with a focus on aligning technology solutions with business objectives.

Experience

Freelance Enterprise Technology Consultant / Technical Program Manager / Full-Stack Software Developer

November 2023 – Present

- Provided consulting services for enterprise clients, delivering custom technology solutions to optimize infrastructure and streamline business operations.
- Managed multiple technical projects, overseeing full software development lifecycles and ensuring timely delivery while meeting budget and stakeholder requirements.
- Developed full-stack web applications using C#, JavaScript, Angular, Python, and SQL to meet specific client needs.
- Implemented cloud solutions across AWS, Azure, and GCP, optimizing enterprise systems for cost-effectiveness, scalability, and performance.
- Integrated Agile practices to improve workflow efficiency and ensure alignment between development teams and business outcomes.

Innovative Software Solutions / ESO – Solutions Architect / Full-Stack Software Engineer

May 2022 - Nov 2023

- Spearheaded the development and management of six applications for the healthcare sector, ensuring high-quality, scalable solutions.
- Led cloud migration efforts that enhanced operational efficiency by 25%, while improving security with encryption protocols and optimizing system performance.

- Collaborated with cross-functional teams to deliver regular feature updates, increasing user engagement and satisfaction.
- Managed the technical architecture and coordinated with stakeholders to ensure alignment with business goals.

Tadpull Inc. – Operations Specialist / Full-Stack Software Engineer

Sep 2021 - May 2022

- Led the implementation of an Agile development framework that accelerated feature releases, improved communication across teams, and significantly reduced costs.
- Managed project timelines and resources using PERT estimates to enhance delivery predictability.
- Developed new features and enhancements in collaboration with data scientists, product owners, and developers, optimizing software usability and user experience.

Steele Consulting Inc. – Technical Project Manager / Full-Stack Software Engineer

Feb 2014 - Mar 2021

- Managed a portfolio of 13+ projects across logistics, healthcare, and eCommerce, overseeing their successful delivery from concept to deployment.
- Led cross-functional teams in the development of logistics management systems for Android and iOS platforms, improving operational efficiency and user experience.
- Fostered strong client relationships by maintaining clear communication, managing expectations, and delivering projects that met or exceeded business goals.

Key Projects

- Cloud Migration & Security Enhancement – Healthcare Provider: Led a successful cloud migration that improved operational efficiency by 25%, enhancing security with advanced encryption protocols across critical healthcare applications.
- Mobile App Modernization – Logistics Industry: Directed the transition of a legacy logistics app to a modern, cross-platform solution using Angular and Ionic, improving app performance and usability, and driving user adoption.
- UI/UX Enhancements – Medical Applications: Spearheaded the redesign of core applications to improve user interfaces and user engagement, optimizing front-end architecture with responsive design principles.

Skills & Expertise

Project Management: Agile, PERT Estimation, RACI Matrix, Program Governance,

Cross-functional Team Leadership

Cloud Platforms: AWS, Azure, GCP

Programming Languages: C#, Python, JavaScript, TypeScript, SQL

UI/UX Design: Prototyping, Wireframing, User Testing

Frameworks: Angular, ASP.NET, Ionic

Databases: MSSQL, MySQL, PostgreSQL, NoSQL (MongoDB)

Tools: Jira, Confluence, Git, Jenkins

Certifications & Education

Certified ScrumMaster (CSM)

AWS Certified Solutions Architect

Bachelor of Science in Computer Science - New Mexico State University
